## PATENT

## ELECTROMAGNETIC SHIELDING STRUCTURE

## Filed by: SAINT-GOBAIN GLASS FRANCE

## ABSTRACT

Electromagnetic shielding structure comprising at least transparent substrate (20), conducting a element (30), optionally a transparent backing sheet (31) and a transparent tie sheet (22) and a transparent sheet additional sheet (23) orcovering electrical connection means (40) being intended to be connected to the conducting element (30) in order to ground the latter, characterized in that one at least of the backing sheet (31), the tie sheet (22) or the additional sheet (23) or covering sheet (24), when it is present, is, at least on one of its sides, placed set back toward the interior of the structure relative associated free edge of the transparent to the substrate (20) so as to leave a portion (32) exposed on at least one of the faces (30a, 30b) of the conducting element, the connection means (40) being placed against and/or connected to this exposed portion (32).
